

We don't go to school right now. We can spend more time actively together with the family. We live in a house outside of Cracow, so we can play football in the garden when the weather is nice.

We jump on our trampoline almost every day, practicing various, sometimes strange figures. In the afternoon we often go on bike trips. We also work in our garden, sometimes we even help our parents.

My brother and parents like to cultivate flowers or prune trees. They also plant spring flowers. Sometimes we also go for walks, we like to go to the forest together. But it's always the best to come home, when our mom prepares a delicious pizza for us :)

Because I can't see my friends now, I have to think of some games at home with my brother and sister. We like to place lego blocks very much. However, I hope then we get back to school and normal activities soon.
